HAZARDOUS WASTE LABELS: TYPES AND VENDORS

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction

A. Accumulation and Storage Requirements

To comply with Title 22 of the California Code of Regulations (CCR), hazardous waste containers must be marked with specific information. Generally, hazardous waste containers must be labeled with the following information during accumulation and storage: [22 CCR §66262.34(f)]

- ° The words "HAZARDOUS WASTE";
- ° The accumulation start date for the waste in the container;
- ° Composition (e.g. used oil; acetone 40%, toluene 60%; etc.) and physical state (i.e. solid, liquid, etc.) of the waste;
- ° Hazardous properties (i.e. flammable, corrosive, reactive, toxic) of the waste;
- ° Name and address of the facility generating the waste.

The easiest way to comply with these requirements is to complete one of the California hazardous waste labels distributed by label suppliers.

[Note: For a detailed guide regarding requirements for the marking of containers during accumulation and storage, refer to the "Marking Requirements and Guidelines for Hazardous Materials and Hazardous Wastes" available at www.unidocs.org.]

B. Types of Hazardous Waste Labels

The following table lists the most common types of labels available:

Label Type	Use	Typical Cost*	Comments
California Hazardous	Accumulation/shipment of	\$15 - \$30 per	Standard label. Since California law requires
Waste Label.	hazardous waste.	pack of 25.	specific wording, labels used must be the
			California version.
Modified California	Accumulation of hazardous	\$25 - \$35 per	Similar to standard label, but has space for
Hazardous Waste	waste.	pack of 25.	multiple accumulation start dates. Ideal for
Label (for multiple			containers which are pumped out on-site by
accumulations).			waste haulers.
"Drained Used Oil	Accumulation/shipment of	Free - \$20 per	Labels available from used oil filter recycling
Filters" label.	drained used oil filters.	pack of 100.	transporters. Use only for containers of used
			filters to be transported off-site to a smelter for
			recycling per 22 CCR §66266.130(c)(3). All
			other filter containers must be marked with a
			California Hazardous Waste Label.

^{*} Most vendors sell labels in minimum quantities or by package.

C. Pre-Transport Requirements

If the hazardous waste container is to be shipped off site it must, prior to shipment, <u>in addition to</u> meeting accumulation and storage requirements:

1. Be packaged, labeled, and marked in accordance with all applicable United States Department of Transportation (DOT) requirements. [Title 49, Code of Federal Regulations]

- 2. Be marked with the following information: [22 CCR §66262.3]
 - ° The words "HAZARDOUS WASTE State and Federal Laws Prohibit Improper Disposal. If found, contact the nearest police or public safety authority, the U. S. Environmental Protection Agency or the California Department of Health Services";
 - ° The Uniform Hazardous Waste Manifest document number.
